Abdi Ahmed Bare

Canadian Citizen | 519-731-0499 | ibnuahmedbare@gmail.com | linkedin.com/in/abdi-bare-a7267b24a | https://github.com/

Education

University of Guelph — Guelph, ON
Bachelor of Engineering in Computer Engineering — *Sept. 2021 – April 2026*

Alinjugur Secondary School — Fafi, Garissa, Kenya
May 2016 – Nov 2019

Experience

Production Associate/machine operator — May 2023 – Sept 2023
Linamar Corporation — *Guelph, ON*

- Eston Manufacturing a Division of Linamar Holdings

Student Collection & Resource Management Assistant — Sept 2022 – Apr 2023
University of Guelph — *Guelph, ON*

- Contract Part-Time
- Project Management

Student Collection & Resource Management Assistant — May 2022 – Aug 2022
University of Guelph — *Guelph, ON*

- Contract Full-Time
- Project Management

Projects

Motor Reverse Engineering Project | *SolidWorks* — Jan 2024 – Feb 2024

- Collaborated with a team of five to disassemble and analyze an actual motor, gaining a comprehensive understanding of its components, shapes, and dimensions.
- Recreated detailed 3D models using SolidWorks, utilizing features such as parametric design and assembly modeling.
- Produced a refined animation using all SolidWorks parts to effectively visualize the motor's mechanism, improving smoothness and showcasing shaft movement for a clearer demonstration.

YouTube Cloning Project | *HTML, CSS, Git, Laserfiche API* — July 2024 – Sept 2024

- Developed a system using NetBeans and Laserfiche API to automate large dataset filtering and file management.
- Developed an interactive frontend of Youtube.com Website with HTML and CSS only.
- Produced a working replica of YouTube.com
- Utilized custom-built CSS built in features to efficiently manage web structures operations

Autonomous Vehicle Design Project | *Arduino, C, AutoCAD, Circuit Design* — Sept 2022 – Dec 2022

- Programmed an Arduino using C to control the autonomous vehicle's motors and sensors for optimal navigation.
- Designed and built an electric circuit to power the motors, integrating motor controllers for efficient operation.
- Developed AutoCAD drawings for a motor controller to simulate and optimize motor performance within the vehicle's power system.

Technical Skills

Software: 2D AutoCAD (Advanced), SolidWorks (Advanced), SketchUp (Intermediate), MS Word (Expert), MS PowerPoint (Expert), MS Excel (Advanced)
Programming: C (Advanced), HTML (Advanced), CSS (Advanced), JavaScript (Advanced), Java (Intermediate), Python (Intermediate), VHDL (Intermediate)
